

JACOPO RIGOLI

Software Engineer

I'm a passionate software engineer specialized in designing and building software architectures and backend systems.

Currently, as a Scrum Product Owner, I'm guiding the development of a *workflow management* system at **e-globe solutions AG**.

About Me

Hi, my name is Jacopo Rigoli, and I'm a software engineer located in Italy. My alma mater is Politecnico di Milano, where I graduated in Computer Science and Engineering in 2016.

Download CV 

I've spent the past 8+ years working across different areas of software development. I've started as a frontend developer, then my career moved completely to the backend where I'm most experienced. In the last years I'm spending more and more time with *AWS* and *serverless* technologies.

Meanwhile, I've mentored junior engineers, I've led cross-functional teams, and I've also done some experiences with the *Scrum* methodology as a *Scrum Master* and as a *Scrum Product Owner*.

I'm an enabler leader and also a team player able to stay calm under pressure. I've demonstrated to be a well-organized person, problem solver, dedicated, enthusiast, independent employee.

Fan of soccer, outdoor activities, TV series, food and my family.
